

Information Notice: Reports Migration - ESAR A2.1 and M1

Attention All ACE Report Users

In order to accommodate additional reporting capabilities, the A2.1/M1 release will require a more robust data warehouse. Accordingly, as part of the deployment of A2.1, the existing data warehouse information will be migrated to the new data warehouse. To accomplish this, the following migration activities will occur:

- Between January 19 and January 24, 2009, Account Management, Authorized Data Extract and Transactions reports will remain “static.” **No nightly updates will occur during this data migration.** Transactions not posted to the data warehouse from January 19 through January 24 will then be loaded. **We estimate that all data will be up to date on January 27, 2009.**
- Account Revenue reports will not be migrated until the afternoon of January 24, 2009. Only those reports generated up until the afternoon of January 24, 2009, will be up to date. **Data in Account Revenue reports will then become static until the morning of Jan 25th.**
- A message will be posted to the ACE News Tab upon the conclusion of the migration and the completion of the reports data.
