Introductions and General Information

Organization of this Document

With the exception of carriers, these instructions are for all trade users. This document provides information on basic functionality of the ACE Reports Tool and outlines detailed instructions on how to access available reports. These instructions begin with features that apply to all reports users. Following the basic features, instructions are organized into four key sections:

- 1) Standard Reports – Viewing reports with pre-set data fields.
- 2) Modified Reports – Modifying data fields within standard reports.
- 3) Customized Reports – Building fully customized reports from a blank slate.
- 4) Authorized Data Extract (ADE) – Downloading reports that exceed current data limits of 65,000 lines. This function can only be performed by Trade Account Owners (TAOs) and Proxy TAOs (formerly known as “bulk data download”).

Each of the first four sections is organized similarly by providing instructions on how to run, filter, sort, save, schedule and print reports. The instructions provided are designed to supplement the web based training titled, “*ACE Reports for the Trade Community*” and other instructional documents within the Training and Reference Guides section on cbp.gov/modernization.

Introductions to the ACE Reports Tool

By selecting **Launch Tool** within the “*Reports*” link on the “*Accounts*” tab, you have many report options. The ACE Reports Tool allows you to run a variety of reports that range from standard reports to reports fully tailored to meet your needs. The Reports Tool also allows you to print, download and save these reports for later use or further manipulation. This document is intended for all trade users except carriers. Truck carriers should refer to “*Running ACE Reports for Truck Carriers*” and CBP to “*Running ACE Reports for CBP*,” respectively.

The reports available are organized into several folders. Importers, brokers and other trade users will find the following reports useful: “*Account Management*,” “*Account Revenue*,” “*Entry Summary*” and “*Reference*.” There are “*Transactions*” reports for truck carriers, and numerous other choices for internal CBP users. To help navigate through the available reports, there are several sub-folders within these folders.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

I. Account Management

Within the “Account Management” folder the following six sub-folders are available:

1. Account Profile
2. Aggregate reports
3. Broker Permits and Employees (Brokers/Filers Only)
4. Declarations (Importers & Brokers Only)
5. Detail reports
6. Quick Views

Within Aggregate and Detail reports the user can then choose from:

1. Cargo Entry reports
2. Cargo Exam reports
3. Entry Summary reports
4. Entry Summary Compliance reports

II. Account Revenue

1. Workflows

III. Authorized Data Extract (Importer and broker TAO and PTAO Only)

IV. Entry Summary

Within the “Entry Summary” folder the following two sub-folders are available:

1. AD/CVD
2. Trade Actions

V. Reference

VI. Transactions

1. BRASS Reports (Brokers/Filers Only)

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Importer Portal Account View

Within the “*Reports*” tab the report list is used to find the desired report category.

Select the “+” to expand the report list and the categories

See “Appendix A” of this document for a list and brief description of all Account Management, Account Revenue, Authorized Data Extract, Entry Summary, Reference and Transactions reports.

Account Management Reports: All current Account Management and Account Revenue reports will include data for all entries/entry summaries regardless of the system of record for the entry summary (ACE vs. ACS).

ESM 7025 *CBP Form 28, 29, 4647 Status Report* will include information pertaining to all forms issued by CBP for both ACS and ACE entry summaries when the action is created in ACE.

Software Set Up and Requirements

It is important for first time users to verify setting preferences and that Java is installed on the computer. Internet Explorer is recommended to access any ACE reports or to utilize the ACE Portal. To run Modified or Customized reports or to download the ADE reports, the user must set their preference to “*Interactive*” and must operate Java. To set preferences or to verify Java, follow the instructions below:

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

- Setting Preferences

When you select the **Reports** tab and select **Launch Tool**, the “Welcome to ACE Reports” screen, as shown above, will display.

1. Select the **Preferences** icon or the link from the “Welcome to ACE Reports” page. A new screen will open.
2. Select the **Web Intelligence Document** tab.
3. Select the **Interactive** radio button under “Select view format” and the **Java Report Panel** radio button under “Select report panel.”
4. Scroll down and select **OK** on the bottom right hand corner of the screen.

- Verifying Java

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

All users need to verify Java is running on their computer. To determine if Java is on your computer, follow the steps below:

1. Launch Internet Explorer.
2. Select **Tools**.
3. Select **Sun Java Console**.
4. Verify Java Plug-In Version.

*If a pop up appears asking if you want to upgrade to the latest version of Java, CBP recommends you **NOT** upgrade to a version higher than Java 1.6.*

Terminology

There may be unfamiliar terms and acronyms used within the ACE Secure Data Portal. Here are 5 frequently used terms when running reports:

- **Universe**: A representation of the information available in a database. Universes are made up of classes and objects.
- **Class**: Logical groups of objects with a meaningful name.
- **Object**: A named component that maps to data in the database. Blue boxes = Dimensions (qualitative) and Purple circles = Measures (quantitative).
- **Query**: A request for data from the database.
- **Filter**: A control to limit the amount of returned data.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Using the Toolbar

Log on to ACE; select the appropriate view (that is, Broker, Importer or Surety) and select **GO**. Select the **Reports** link and then select **Launch Tool**.

At the top left of the “Welcome to ACE Reports” page there is a gray toolbar that displays the following icons:

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

- Home Icon: The “Home” icon on the far left of the toolbar is the home page for the report tool. By selecting the “Home” icon, you will be returned to the home page and will see “My Folders” and “Public Folders” displayed.
- Toggle Navigation Icon: The square icon to the right of the house is the “Toggle Navigation” icon that allows you to show or hide the “Folders” panel. You can also hide the “Folders” panel by selecting the arrow in the right corner of the panel.
- Applications Icon: The third icon from the left on the toolbar is the “Toggle Applications” icon.
- New Icon: The fourth icon on the toolbar is “New.” This icon will allow you to create private folders. See topic, “Saving a Standard Report or Saving a Modified Report” for additional information.
- Refresh Icon: The fifth icon is the “Refresh” icon. Selecting this icon will refresh your “Workspace Panel.”
- My InfoView Icon: “My InfoView” allows you to customize your dashboard. See section, “Customizing Your Dashboard” for additional information.
- Search Title Icon: The “Search” function allows you to search for reports by title and keyword and advanced options. See topic, “Searching for a Report.”

The three icons on the far right side of the toolbar are:

- Preferences: Allows you to set how information is displayed in your workspace panel.
- Log Out: Logs you out of the Reports Tool.
- Help: Displays the Online Help for the Reports Tool.

Under the gray toolbar there is a blue toolbar containing four icons on the right side of the workspace view.

- The upward pointing arrow “↑” removes the header from the screen. To reinsert the header, select the downward pointing arrow “↓.”
- The large box to the right of the arrow maximizes the workspace panel.
- The two smaller boxes minimize the workspace panel.
- The “x” returns the workspace panel to the last main page visited.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Hold your mouse arrow over any one of these icons to display a text box with the definition of the icon.

The “back” button only works in the ACE Reports Tool and does not work with any other Portal application.

In order to modify a report with additional data elements, you must have your preferences set to “Interactive,” as stated under the “Setting Preferences” section. If this is not done, “Available Objects” will not appear on your screen and you will not be able to modify your report.

Before selecting the “Reports” tab, please ensure you have selected the correct view for your account type. For example, importers must be under the importer view before running ACE reports.

Customizing Your Dashboard

You have already logged into the ACE portal, selected the **Reports** link from the “Accounts” tab and launched the report tool.

1. Select **My InfoView** from the gray toolbar.
2. You will notice the “Choose Template” option under “My InfoView.” There are six templates available. Select the template you would like to use to customize your dashboard (for example, select on the template with two containers).
3. Select the **Define Content** link. The “Dashboard Properties” window opens.
4. Select the “+” next to “My Folders” then select **Favorites**.
5. Select the **OK** button.
6. Follow steps above to define the content of additional containers.

In the “Dashboard Properties” window you also have the option to “link to web address.” For example, you could link to www.CBP.gov from your dashboard.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Searching for a Report

The center icon in the toolbar is “*Search title.*”

1. Select the down arrow ↓ beside “*Search title.*”
2. Select the **Search Title** to view the following 4 options: (1) *Search all fields* (2) *Search title* (3) *Search keyword* or (4) *Advanced search*. Select how you would like to search.
3. Enter the word, partial word or report number (e.g. AM-008) in the text box for the report you want to find and it will return any report that has that text in the title. By default, you can also search keywords.
4. Select the right arrow “→.” Your search results will appear in the workspace panel.

In order for the “Search Keyword” functionality to work you must first save the report to your “Favorites” folder and associate a keyword with that report.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Chapter 1: Standard Report

Running a Standard Report

Standard reports are reports with pre-established data fields. You will be able to add data elements (“objects”) to a standard report; however, only the data elements that are pre-defined for that particular report will be available. If you would like to add additional data elements to the report, you should follow instructions in the next chapter called, “*Modified Report.*”

Data Availability: Data available for ACE reports includes the previous four CBP fiscal years plus the current fiscal year. The CBP fiscal year runs October 1 through September 30.

System of Record Indicator in Reports... A new data field, “System Control Code” has been added to the standard report. This code provides the system through which the entry summary has been processed. For entry summaries transmitted on or after April 12, 2009 the “System Control Code” field will either read ACE or ACS. For entry summaries transmitted before April 12, 2009 the field will be blank.

UOM	Qty	Entered Value	Estd Duty	System Control Code
NO	107,520	\$30,355.00	\$0.00	ACS
KG	22,150	\$5,920.00	\$0.00	ACS
X	0	\$7,957.00	\$0.00	ACE
K	44	\$13,555.00	\$0.00	ACE

You have already logged into the ACE portal, changed to the appropriate view, selected the **Reports** link on the “Accounts” tab and launched the reports tool.

1. Select the plus sign “+” beside “*Public Folders*” in the left hand column. Determine the type of report in the public folders you want to run (e.g. Account Management, Account Revenue, Entry Summary, Reference or Transactions). Continue to select the plus sign “+” beside the report folder to see the sub-folders for Account Management, Entry Summary and Transactions reports.
2. A list of available reports will appear on the right. Select the report name you wish to run. You will see the “*Prompts*” box displayed that allows you to set your preferred parameters for viewing the report. You will then be able to change the prompts for the report. If the prompt shows a red arrow “→” then a value must be entered. If the prompt shows a green check mark “√,” then a default setting has been selected and you can change the prompt or leave the default setting. A

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

value for each prompt must be shown (either entered by you or the default value) before running the query or the “Run Query” selection will not be available.

3. Select the prompt you wish to change. Note, most prompts contain an “--ALL--” option. Either select the --ALL-- option or for greater efficiency, enter the specific value.
 - You can also scroll through the list of values or search for a value by entering it in the box to the left of the binoculars. You will need to highlight your entered value to move it to the selected value box. You can also enter a value in the rectangular box above the selected prompt value.

To improve performance, you should narrow the scope of the report as much as possible by amending the prompts.

4. Select the double right arrow to move the selected value into the box on the right. Note: You will need to use the double left arrows to remove the word “--ALL--” from the box.

5. Repeat steps above for each prompt shown that you wish to change.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

6. Select the date range. You can either enter a date in the text box or left click on the calendar to select the date and/or year. For reports with “*Entry Report Creation Date*” prompt, CBP recommends that you leave the default dates shown.

7. Select **Run Query** to run the report with the prompts you have changed. Note: You will not be able to select “*Run Query*” until all prompts have been satisfied.

When entering an Importer of Record (IR) number, a Social Security Number (SSN) or a CBP assigned number as a prompt, please ensure the dashes are included in the correct location in the number or no data will be returned. It should also be noted that all IR suffixes are case sensitive. You must capitalize the alphabetic suffix for data to be returned. Letters in filer codes must be capitalized.

Once the report has been generated, if there is a blue hyperlink displayed in the report, select the hyperlink to view additional detail. Detail will vary by report. Not all reports contain a hyperlink.

Using the Quick Filter in a Standard Report

To apply filters among the data returned, follow the steps below:

1. Highlight the column you want to filter by clicking below the column header. This will highlight the entire column.
2. Right click your mouse in the highlighted column.
3. Select **Quick Filter**.  The “*Quick Filter*” window will appear.
4. Enter the value you want to filter and then select the double arrows to move the value into the blue box on the right.
5. Select the dropdown arrow to select the filtering options.
6. Select, for example, the “*greater than or equal to*” option.
7. Select the **OK** button at the bottom of the “*Quick Filter*” window. Only values greater than or equal to the value you entered will now appear in the highlighted column of the report.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Sorting a Column in a Standard Report

To sort the data returned, follow the instructions below.

1. Left click to highlight the column in the report that you want to sort below the column header. This will highlight the entire column.
2. Right click your mouse in the highlighted column.
3. Select **Sort**. If the “*Remove Sort*” option is highlighted, select it. You will need to remove the existing sort before selecting a new sort option.
4. Select one of the options displayed, for example, select **Ascending**. The highlighted column now appears in ascending order.

Saving a Standard Report

To save a standard report, you have two options.

1. Save the report in your “*Favorites*” folder in ACE, which allows scheduling capabilities; or
2. Save the report to your computer.

Saving to Your ACE Favorites Folder

To create a folder within your ACE “*Favorites*” folder, follow the steps below:

1. Select the **+** beside “*My Folders.*”
2. Select the **Favorites** folder.
3. Select the **New** icon and select the down arrow.

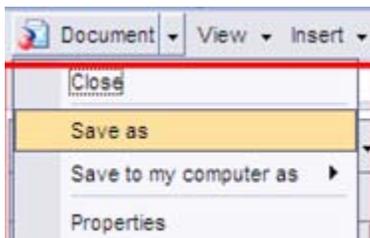

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

4. Select the **Folder** option. The “*Create a New Folder*” portlet appears.
5. Enter a “*Folder Name.*” You also have the option of entering a “*Description*” or “*Keywords.*”
6. Select the **OK** button.

Follow the steps to save to your “*Favorites*” folder:

1. Select the **Document** dropdown by clicking the down arrow.
2. Select **Save as**. The “*Save Document*” dialog box appears. CBP recommends changing the report name. To do that, position your mouse at the end of the report name in the “*Title*” box and select. Type in your new name for the report.
 - a. The “*Refresh on Open*” box, if checked, allows you to save the report format but not the data.

3. Navigate down the page and select the “+” beside “*My Folders.*”
4. Select the **Favorites** folder.
5. Select the **OK** button. You have now saved the report to your favorites.

You can also save a report to any other folder you have created under “*Favorites*” by locating the folder and then selecting it.

Saving to Your Computer

To save the report to your computer, follow the steps below:

1. Select the **Document** dropdown by clicking the down arrow.
2. Select **Save to my computer as**.
3. Select a format, e.g. **Excel**.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

4. Select the **Save** button in the “*File download*” box.

Accessing a Saved Standard Report from Your Favorites Folder

To access a report saved in your Favorites folder, follow the steps below:

1. Select the “+” beside “*My Folders.*”
2. Select the **Favorites** folder. You will see a list of reports you have saved to the “*Favorites*” folder.
3. Select the report you want to open by selecting the report name. The report will display.

Deleting a Saved Standard Report from Your Favorites Folder

To delete a report saved in your “*Favorites*” folder, follow the steps below:

1. Select the “+” beside “*My Folders.*”
2. Select the **Favorites** folder. You will see a list of reports you have saved to the “*Favorites*” folder.
3. Select the check box beside the report name that you wish to delete.
4. Select the **X** icon shown at the top of the “*Favorites*” screen. The report selected will be removed from the “*Favorites.*”

Trouble Shooting Tips on Saving a Standard Report to Your Computer

When you try to export a report to your computer using the “*Document*” / “*Save to my computer as*” menu option and the screen flickers but nothing happens, check your download security options in Internet Explorer. To do so, follow the steps below:

1. Open Internet Explorer.
2. Select **Tools** and then select **Internet Options.**
3. Select the **Security** Tab.
4. Highlight the Internet Globe and select **Custom Level.**
5. Scroll down the list of choices until you find the “*Downloads*” section.
6. Locate “*Automatic prompting for file downloads*” and select **Enable.**
7. Locate “*File download*” and select **Enable.**
8. Locate “*Font download*” and select **Enable.**
9. Select **OK** to close the dialogue box.
10. Select **OK** to close the Internet Explorer properties box.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Turn off any pop-up blockers that are active so that the report will download.

Data Refresh

- *Entry, Entry Summary and Bond data are refreshed nightly. Entries filed on Monday should be available for reports run on Tuesday. For truck carriers, transaction data in reports is also refreshed nightly.*
- *Compliance data is refreshed monthly, normally around the 25th of the month. For example, January compliance data should be available around February 25th.*
- *Periodic monthly statement data is refreshed hourly.*

Scheduling a Standard Report

You have already logged into the ACE Portal, selected the **Reports** link on the “Accounts” tab and launched the report tool. You now have the option to schedule a report to run from your “Favorites” or “Public Folders.” Scheduling a report from your “Favorites” will generate the report you saved. Scheduling a report from the “Public Folders” will generate the standard report. To schedule a report with moving date parameters, such as “45 Days Ago,” please review “Running a Modified Report” section.

[History](#) | [Schedule](#) | [Properties](#)

1. Select the report that you wish to run.
2. Run the report and save it to your “Favorites” folder or a personal folder that you have created (See topic, “Saving to Your ACE Favorites Folder”). This will allow you to schedule a standard report.
3. Select the “+” beside “My Folders.”
4. Select the **Favorites** folder. Choose the report you want to schedule.
5. Select the word **Schedule** under the report name. The “Schedule” portlet displays.
6. Notice that the “Instance title” fills with the report name you selected. The “When” category expands to reveal a dropdown menu. “Run Object” will default to “Now.”
7. Select the **Run Object** dropdown.
8. Select, for example, the **Last Day of the Month** from the dropdown.
9. Notice that the remainder of the “When” category has changed to include a “Start Time” and “End Time” selection. The “Start Time” is the time and date

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

you would like this report to run on a recurring basis. The “*End Time*” is the time and date that you no longer wish to have the report run on a scheduled basis.

10. Select the **Start Time** from the dropdown menu.
11. Select the **Calendar** icon and select, for example, **February 28**.
12. Follow instructions above to select the **End Time**. You may also want to change the end date for the report since the default is 2017.
13. Select the “+” next to the “*Format*” option to specify the format for the report.
14. The default is “*Web Intelligence*.” Select the dropdown if you want to change to either Microsoft Excel or Adobe Acrobat.
15. Select the “+” next to the “*Prompts*” option then select **Modify Values**. If you do not change the date range on your prompt values once you select “*Modify Values*,” you will see the same results each time the report is scheduled.
16. Enter the filters you want included in your report and select **Apply**. The prompt values will be displayed.
17. Select the **Schedule** button to complete scheduling the report. When the scheduled standard report is run, it will appear in your “*Inbox*” which is located under “*My Folders*.” If you schedule the report from your “*Favorites*” the report results can be found by selecting the “*History*” link under the name of the report you scheduled.

Rescheduling a Standard Report

1. Select the “+” beside “*My Folders*.”
2. Select the **Favorites** folder. Choose the report you want to reschedule.
3. Select the word **History** under the report name.
4. Select the **Reschedule** link. You are returned to the schedule page.
5. Select the “+” next to the “*Prompts*” option then select **Modify Values**.
6. Enter the filters you want included in your report and select **Apply**. The prompt values will be displayed.
7. Select the **Schedule** button to complete scheduling the report.
8. You are now returned to “*History*” and will notice there are two instances of the scheduled report.
9. On the tool bar within the portlet, place a check mark in the small box next to the originally scheduled instance of the report and select the **Delete** button to remove the old report.

Deleting a Scheduled Standard Report

1. Select the “+” beside “*My Folders*.”
2. Select the **Inbox** folder.
3. Select the check box beside the report name that you wish to delete.
4. Select the **X** icon shown at the top of the “*Inbox*” screen. The report selected will be removed from the “*Inbox*.”

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Creating Charts and Graphs in a Standard Report

There are several options to create a chart or graph of the data retrieved.

Chart Types

There are five basic chart types available: bar charts, line charts, area charts, pie and radar charts, polar and scatter charts. There are also multiple options within these chart types. Chart selection will vary depending on the data you are charting.

1. **Bar Charts:** Bar charts display data in bar form, either vertically or horizontally. Bar charts are useful if you want to compare similar groups of data. There are 5 types of bar charts: grouped, bar and line, stacked, percent, and 3D.
2. **Line Charts:** Line charts connect specific data values with lines, either horizontally or vertically. Line charts are useful if you want to show trends or changes in data overtime. There are five types of line charts: mixed, stacked, percent, 3D and 3D surface.
3. **Area Charts:** Area charts are line charts in which the area between the lines and axis are filled in. Area charts are useful if you want to emphasize the size of the total data in a report, as opposed to the changes in the data. If you have a sharp contrast between specific data points, it is recommended that you use a line chart instead of an area chart.
 - a. You can use more than one object on the Y-axis as long as the measures are the same type and scale, e.g. number of entry summaries reviewed and number of discrepancies found. There are five types of area charts: absolute, stacked, percent, 3D area and 3D surface.
4. **Pie Charts:** Pie charts display data as segments of a whole. Pie charts are useful if you want to show how each part of your report data contributes to the total.
 - a. You can only include one object in a pie chart. If you have several measures in your report, you should choose another chart type. There are four types of pie charts: pie, 3D pie, ring and 3D ring.
5. **Radar, Polar and Scatter Charts:** The four types in this category are radar line, stacked radar, polar and scatter.
 - a. In radar charts, the X- and Y-axis connect at the chart's center. Radar charts are useful if you want to look at several different factors related to

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

one item. For example, you could use a radar chart to display revenue data for different commodities within a port.

- b. Scatter charts are similar to line graphs, except that the data points are plotted without a line connecting them. Scatter charts are useful to make a comparison between specific data points.
- c. A polar chart is an XY plot drawn on a circular grid, showing trends in values on the basis of angles. The dependent variable (Y) is charted on the radial axis, with the origin (by default) at the center of the circle.

To create a chart from your standard report, follow the instructions below:

1. Select the dropdown arrow in the left margin next to the table of data.
2. Select **Chart and Table Types**.
3. Expand, for example, the “*Pie Charts*” list by selecting the “+” beside “*Pie Charts*.”
4. Select **Pie**.

5. Drag and drop **3D Pie** so that it is displayed at the bottom of the report.
6. The “*Format Chart*” window appears showing the “*Pivot*” tab. You will need to define the “*X-axis*” and the “*Y-axis*” for your pie chart.
7. Select the data element you want from the “*Available Objects*” list to define the “*X-axis*.” You must select an attribute (field shown in blue font) for the “*X-axis*.”
8. Select the right arrow button to add the data element to the “*X-axis*.”
9. Select the **Y-axis** radio button and follow steps 7 and 8 above to define the “*Y-axis*.” You must select a metric (field shown in pink) for the “*Y-axis*.”
10. Select the **OK** button if there are no other changes you wish to make. To view, scroll down to the bottom of the report where you indicated you wanted to insert the chart.

(For all Importer, Broker and Surety Trade Users)

Printing a Standard Report

Reports can be printed in portrait or landscape format.

Printing a Standard Report in Portrait

1. Select the **View** dropdown by selecting the down arrow.
2. Select **PDF** mode. Opening the report in “PDF” mode will allow you to see the report in a printable format. The Adobe Acrobat reader opens to display the report.
3. Select the **Printer** icon. The print options window displays on your screen. From this window you can specify number of copies, etc.
4. Select the **OK** button in the “*Printer*” dialog pop-up box to print.

Printing a Standard Report in Landscape

1. When results are received right click the mouse one time above the report header.
2. Select **Format report** from the dropdown list displayed.
3. Select **Layout properties**.
4. Change paper size to letter or legal.
5. Change orientation to “*landscape*.”
6. Select **OK**.
7. Select the **View** dropdown by clicking the down arrow.
8. Select **PDF** mode. Opening the report in “PDF” mode will allow you to see the report in a printable format. The Adobe Acrobat reader opens to display the report.
9. Select the **Printer** icon. The print options window displays on your screen. From this window you can specify number of copies, etc.
 - a. Select **Properties** and then **Basics** to change the orientation to **landscape**. This may be a two step process.
 - b. Another option is to check “*Choose paper source by PDF page size*.”
10. Select the **OK** button in the “*Printer*” dialog pop-up box to print.

Chapter 2: Modified Report

Running a Modified Report

The ACE Reports Tool allows you to modify a standard report by providing greater flexibility in choosing the data objects desired. The “*modify*” functionality has greatly enhanced the ability to customize reports and improve reports performance. You are no longer restricted to the available objects list. The entire universe of objects is now available utilizing the “*Edit Query*” mode. In addition, reports run faster because filters may be applied prior to generating the report. Furthermore, ACE Reports now allows reports to be scheduled within set date parameters, such as “7 Days Ago” and “Today.” This will be discussed later in the document.

System of Record Indicator in Reports... A new data field, “System Control Code,” has been added to the standard report. This code provides the system through which the entry summary has been processed. For entry summaries transmitted on or after April 12, 2009 the “System Control Code” field will either read ACE or ACS. For entry summaries transmitted before April 12, 2009 the field will be blank.

UOM	Qty	Entered Value	Estd Duty	System Control Code
NO	107,520	\$30,355.00	\$0.00	ACS
KG	22,150	\$5,920.00	\$0.00	ACS
X	0	\$7,957.00	\$0.00	ACE
K	44	\$13,555.00	\$0.00	ACE

To run a modified report, follow the instructions below using the “AR 006 Periodic Statement Detail” report as an example:

1. Select the **Reports** link on the “Accounts” tab.
2. Select **Launch Tool**.
3. Select the “+” beside “Public Folders.”
4. Select the “+” beside the “Account Revenue” Sub-folder.
5. Select **Workflows** and select the “AR 006 Periodic Statement Detail” report.
6. Select **Modify** below the report name.

- a. Selecting **Modify** allows greater editing capabilities.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

- b. Selecting the report name will generate the standard report. You will not be able to add “*Available Objects*” to modified reports.
7. Select **Yes** if you see a “*Warning – Security*” message displayed after selecting **Modify**.
 - a. You will see messages cycle through the window until all of the report information has been retrieved.
8. Select **Cancel** when the “*Prompts*” box displays to enter the edit mode.
 - a. If you know you will be modifying the report once it is generated, select **Cancel**.

- b. If you want to run the standard report with no customization, enter data for the prompts.
9. A new screen displays; select the **Edit Query** button located just below the report title.

10. Delete extra objects in the standard report by highlighting the object and selecting the **Delete** button. You may also drag the object to be deleted into the list of objects under the “*Data*” panel.
 - a. By deleting an object from the “*Results Objects*” pane, the object remains available in the “*Data*” panel. Objects in the “*Data*” panel are not part of the report query’s output.

11. To expand the list of objects:
 - a. Select a “*Universe*” (e.g. **Account Revenue**) by clicking the “+” sign.
 - b. Select a “*Class*” (e.g. **Receivables, Inventory**, etc.) to expand the list of objects. Additional data elements will be displayed to customize the report.
 - c. Select the object and drag it from the left side of the screen under the “*Data*” tab to the “*Result Objects*” pane. For example, add **class code** and **class text** to the report to view fee breakouts.
 - d. Note: You may also select the new object by double-clicking the object to move it to the “*Results Objects*” pane. Multiple objects may be selected at one time by holding down the shift key to move them to the “*Results Objects*” pane.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

- e. By dragging and dropping an object into the “*Result Objects*” pane the object will be available to add to the report once it has run.

Adding New Date Objects for Modified Reports

Date Objects allows reports to be run and updated with variable date ranges. Reports no longer must be run against specific calendar dates; they can now be run with date ranges such as “*7 Days Ago*” and “*Today*.” This eliminates the need to filter by date each time you choose to run a report.

*If you select the **7 Days Ago** or any date object with fewer days, you must enter **Yes** for “Include Entries with No Entry Date” in the “Prompts” pop up box. The default for this criterion is “No,” which will filter out entries filed within the last ten business days. By entering “Yes” the report will return data for entries filed within the past ten business days.*

*By doing this, the report will also display results of previously cancelled entries. In order to filter the report to exclude old cancelled entries, the *Entry Report Creation Date*” object needs to be dragged into the “*Results Objects*” pane.*

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

To add a new date filter to “AR 006,” for example, add the new date object to the “*Query Filter*” pane and follow the steps below:

1. Once the new date filter has been added to the “*Query Filter*” pane, select the dropdown arrow “▼” next to “*In List*” to view options for defining the filter.
2. Select **Between**.
3. Select the first filter type menu button  and select **Object**.
4. Select the “+” icon next to the “*Date Objects*” class to expand the folder.
5. From the “*Date Objects*” class, select **45 day ago** as an example.
6. Select the second filter type button and select **Object**.
7. Select **Today**.
8. Select **Run Query**.

Note: If you save the AR 006 report to your “*Favorites*,” when you run the report it will always display entry summaries flagged for periodic statement with a date range of the last 45 days until today.

Hyperlinks do not work in edit mode. The report must be viewed, not edited, for the hyperlinks to work.

Using the Query Filters in a Modified Report

Once you have entered all the data objects needed for your report, the system can filter these data objects and return only the desired data fields. This can be done by using

“*Query Filters*.”  “*Query Filters*” allow you to retrieve a sub-set of the data requested, resulting in improved report performance and usability.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Follow the steps below to add filters to the “*Query Filters*” pane. Similar to the data objects in the “*Result Objects*” pane, dragging and dropping an object into the “*Query Filters*” pane will apply it to the query. “*Query Filters*” is where the prompts can be set.

1. After adding a new filter to the “*Query Filters*” section, select the  down arrow to view options for defining the filter.

2. Select **Constant**, **Value from a List**, **Prompt**, or **Object**.
 - a. A “*Constant*” allows you to enter a specific value or values that do not change unless you edit the query again. This is useful when you have a certain port, carrier, importer, broker ID, or other data that remains the same for this report.
 - b. “*Value from a List*” allows you to select a value from a list, if one is provided.
 - c. “*Prompt*” allows you to type in text when prompted. When the report is run the prompt will require your input. You may also select default values if you choose a prompt.
 - d. “*Objects*” will allow specific variable objects to be used in the filters. See section titled “*New Date Objects.*”

3. Select the **Edit Report** button. 
 - a. When you return to the “*Edit Report*” view, the new data objects added to the report will be displayed in the “*Data*” pane.
 - b. You must add the new data objects to the report in order to see the data.
4. Drag and drop or double-click the objects to be added to the final report. It is possible to add more than one object at a time by highlighting the objects to be added to the report.

5. Select the **Refresh Data** button. 
6. When the “*Prompts*” dialog box opens, update prompts as needed, then select **Refresh Data** to display the report.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

OR in lieu of steps 1 through 6

7. Select **Run Query** button. 
8. When the “Prompts” dialog box opens, update prompts as needed then select **Run Query** to display the report.
9. Drag and drop or double-click the objects to be added to the final report. It is possible to add more than one object at a time by highlighting the objects to be added to the report.

Cannot drop here. Incompatible object.

Incompatible objects: Sometimes it is not possible to use certain combinations of data objects. This is because the data objects are not related. These objects are called “incompatible.” If you run a report and include incompatible objects, you will not be able to combine the data by dragging and dropping objects.

Using Wildcards with Query Filters

Within “Query Filters,” you have the ability to use wildcards on any alpha numeric field. The wildcard symbol is “%.” For example, a wildcard may be used with an Importer of Record (IR) number by entering the first 9 digits followed by the percent sign. If you enter “12-3456789%,” the report will return 11 digit IR numbers that have “12-3456789” as the first nine digits. Another example is using a wildcard with the Harmonized Tariff Schedule (HTS) number by entering the four, six or eight digit HTS number followed by the percent sign. Entering “9102%” will pull all 10 digit HTS numbers that begin with 9102. It will take a little longer for the report to display when using the wildcard capability.

The example below outlines the steps to run a report filtering by IR number and using the wildcard.

1. Select the report.
2. Select **Modify** below the report name.
3. Select **Cancel** when the “Prompts” box displays to enter the edit mode.
4. A new screen displays; select the **Edit Query** button located just below the report title.
5. Add and remove data elements as needed.
6. Select the object you want to use as the wildcard capability. The object **MUST** appear in the “Query Filters” pane.
 - a. Let’s assume you want to use the wildcard on the IR number. If the IR

number appears with the  icon, delete the object by highlighting it and selecting the **Delete** button or right click and select **Remove**. You may also drag the object to be deleted to the objects list under the “Data panel”.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

- b. Under the “Data panel”, open the “*Importer*” class and drag the IR number object to the “*Query Filters*” Pane.
- c. Select the down arrow “▼” beside “*In List*” to view options for defining the

filter. 

- d. Select **Matches Pattern**.

- e. Select the down arrow “▼” next to “*Type a constant*” and select **Prompt**.

7. Select **Run Query** button.
8. When the “*Prompts*” dialog box opens, update prompts as needed. Enter the IR number with the wildcard, for example “12-3456789%.” 
9. Select **Run Query** to display the report. The results displayed will include all suffixes associated with the nine digit IR number entered.

If doing a word search (such as by importer name) using the wildcard search feature, remember alphabetic characters are case sensitive. Results will be only returned if it is an exact match to the wildcard search.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

In addition to adding a data element to the body of the report, you can drag a data element and place it above the table to further customize the report by that specific data element. For example if you are running “AM 012, Summary of Port of Entry Codes by Value”, and you select the “Country of Origin” and place it above the table, your data would be sorted by country of origin allowing you to view what is imported into each port by country.

Using a Quick Filter in a Modified Report

Once you have selected the desired data objects, used the “Query Filter” function, and have run your query, you can now apply a quick filter. To do so follow the steps below:

1. Select the column you would like to filter by placing your cursor within the column and left click.
2. Select the **Quick Filter** icon in the tool bar. 
3. “List of Values” pop up window appears. Select the values you would like filtered. You may select one or more values. To select more than one, hold down the “Ctrl” key and click on each additional value. To select more than one consecutive value, select one value, hold the “Shift” key and select another value. All values in between the two values selected will be highlighted.
4. Select **OK** and your revised report will display.

You may occasionally see a “Context Pop-up” if based on the objects and filters you have chosen, the reports tool has more than one way to answer the question. When this happens, the possible classes will be listed and any one of them is valid depending on the results you are seeking. This will happen more frequently with Transactions reports than Account Management reports. Let’s say as a broker you want a list of importers whose entry summaries had been flagged for team review in the past 6 months. You can create your report by selecting filer code, importer number and importer name. In this example, the objects can be pulled from several classes. You would highlight the “Team Review” class to obtain the needed results.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Adding a Query

In addition to being able to modify the report selected you can also add a query to that report. To add a query, follow the steps below after you select **Modify** for the report you want to customize and then **Edit Query**.

1. Select **Add Query** button on the query toolbar. A new screen appears asking you to “*Select a universe for the query.*” You can create a new query on a universe already used or select a different universe.

2. Select the appropriate universe by highlighting it under the “*Other available universes,*” then select **OK**. A new query screen appears.

3. To expand the list of objects under the Account Management Universe:

- a. Select a “*Class*” (e.g. Entry Case Quantity) to expand the list of objects. Additional data elements will be displayed to customize the report.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

- b. Select the objects you would like displayed in the report and drag them from the left side of the screen under the “Data” tab to the “Result Objects” pane.
 - c. If you would like to include all of the objects in the “Result Objects,” simply highlight the class name and drag that into the “Result Objects.”
 - d. The objects and filters you define will only apply to the selected query.
4. Select the **Run Query** button,  if you want the data from both queries to be displayed.
 5. When the “Prompts” dialog box opens, update prompts as needed then select **Run Query** to display the report.
 6. The “New Query” box appears asking you to “Choose how you want to include the data from the new query.”

If you want to:	Then select:
Display the data on a new report	Insert a table in a new report
Display the data on the current report in a new table	Insert a table in the current report
Include the data in the document without displaying the data in a report	Include the result objects in the document without generating a table

7. Select, for example, **Insert a table in a new report**. The new query will appear as a new tab at the bottom of the results when the report displays.

8. Select **OK**.

OR

9. If you want to return data for just the new query, select the dropdown arrow next to the “Run Queries” button on the toolbar and select **Query 2**.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

10. Follow steps 6 – 8 above to include the data from the new query and to display the results. The results will display under “*Report 2.*”

When creating a report from scratch or adding a query to an existing report, if you are logged on as a Broker, you **MUST** include your filer code in the report to receive results. The filer code can be added to either the “*Result Objects*” pane or the “*Query Filter*” pane.

To add the filer code to the “*Result Objects*” pane, select the filer code with the blue box to the left and drag it over. If you want to add the filer code to the “*Query Filter*” pane, you will need to follow the steps below:

1. Drag the filer code with the blue box to the left into the “*Query Filter*” pane.
2. Select the dropdown arrow to the right of the “*On List.*”
3. Select **Equal To.**
4. Select the dropdown arrow to the right of “*Type a constant.*”
5. Select **Object.**
6. Select the filer code with the blue box to the left from the Broker Class.

Importers and sureties will need to drag their Importer number or Surety code into any report that is created from scratch or when adding a query to an existing report.

Renaming a Query

By default, each query is identified by a number in sequence. The first query is named “*Query 1*” and the second “*Query 2.*” You can rename the query something more meaningful to reflect the data the query includes. To rename a query, follow the instructions below:

1. Make certain you are in the “*Edit Query*” view.
2. Right click the tab of the query you want to rename.
3. Select **Rename Query** from the shortcut menu.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

OR

4. With the query tab highlighted that you want to rename, select the **Properties** tab.
5. Type the name for the query in the “*Name*” box.

6. Press the **Enter** key. The new name appears on the “*Query*” tab.

Sorting a Column in a Modified Report

You have already logged into the ACE portal, selected **Reports**, launched the report tool and successfully run a modified report. The report has returned all the data fields requested, but you would like it sorted differently than the report displays.

1. Highlight the column in the report that you want to sort by clicking below the column header. This will highlight the entire column.
2. Right click your mouse in the highlighted column and select **Sort**, or select the **Sort** icon in the toolbar.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

3. If you choose to sort another column you must remove the existing sort before selecting a new column to sort. This can be done by right clicking on the sorted column and choosing “None.” You may now sort a new column.

You can sort multiple columns at once (e.g., # of entry summaries by port code) as long as the first column sorted has repeated values (e.g., there are at least two different port codes with the same number of entry summaries).

4. Select one of the options displayed, for example, select **Ascending**. The highlighted column now appears in ascending order.

Estd Duty	Nbr of Entry Summaries	Nbr of Lines	Nbr of Discrepancy Flags
\$852,597.31			
\$402,362.11			
\$0.00			
\$1,507,880.01			
\$587.92			

None
Ascending
Descending

Saving a Modified Report

To save the modified report, you have two options.

1. Save the report in your “Favorites” folder in ACE (this allows for scheduling capability.); or
2. Save the report to your computer.

Saving to Your ACE Favorites Folder

Follow the steps below to create a folder within your ACE Favorites folder:

1. Select the “+” beside “My Folders.”

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

2. Select the **Favorites** folder.
3. Select the **New** icon and select the down arrow.

4. Select the **Folder** option. The “*Create a New Folder*” portlet appears.
5. Enter a “*Folder Name*.” You also have the option of entering a “*Description*” or “*Keywords*.”
6. Select the **OK** button.

Follow the steps below to save to your Favorites folder:

1. Select the down arrow “▼” beside the “Save” icon.
2. Select **Save as** from the dropdown list.

3. The “*Save Document*” dialog box displays. Type a new report title in the “*Title*” field.
 - a. The “*Refresh on Open*” box, if checked, allows you to save the report format but not the data.
 - b. The “*Permanent Regional Formatting*” box, if checked, allows you to save the data and the report format.
4. Select the “+” sign next to “*My Folders*.”
5. Select **Favorites** to save the report to your personal folder.
6. Select **OK** at the bottom right of the window.

Saving a Report to Your Computer

Follow the below steps to save the report to your computer.

1. Select the down arrow “▼” beside the “Save” icon.
2. Select **Save to my computer as**.
3. Select either the **Excel** or **PDF** option.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

4. You may also print after opening the report in “Excel” or “PDF”. See section on “Printing a Modified Report.”

Modified reports have only two format options for saving a report from “Edit” mode: “Excel” and “PDF.” If you need to save a customized report in Comma Separated Value (“CSV”) format, you will have to create it using “Edit” mode, then save it to your “Favorites” folder. When you open the report from your “Favorites” folder, you will have the option to save it as “CSV.”

Deleting a Saved Modified Report from Your Favorites Folder

To delete a report saved in your Favorites folder, follow the steps below:

1. Select the “+” beside “My Folders.”
2. Select the **Favorites** folder. You will see a list of reports you have saved to the “Favorites” folder.
3. Select the check box beside the report name that you wish to delete.
4. Select the **X** icon shown at the top of the “Favorites” screen. The report selected will be removed from the “Favorites.”

Trouble Shooting Tips on Saving a Modified Report to Your Computer

When you try to save a report to your computer using the “Document” and then “Save to my computer as” menu option and the screen flickers but nothing happens, perform the following steps:

1. Open “Internet Explorer.”
2. Select **Tools**, and then select **Internet Options**.
3. Select the **Security** tab.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

4. Highlight the Internet Globe and select **Custom Level**.
5. Scroll down the list of choices until you find the “Downloads” section.
6. Locate “Automatic prompting for file downloads” and select **Enable**.
7. Locate “File download” and select **Enable**.
8. Locate “Font download” and select **Enable**.
9. Select **OK** to close the dialogue box.
10. Select **OK** to close the Internet Explorer properties box.

Turn off any pop-up blockers that are active so that the report will download.

Data Refresh

- *Entry, Entry Summary and Bond data are refreshed nightly. Entries filed on Monday should be available for reports run on Tuesday. For truck carriers, transaction data in reports is also refreshed nightly.*
- *Compliance data is refreshed monthly, normally around the 25th of the month. For example, January compliance data should be available around February 25th.*
- *Periodic monthly statement data is refreshed hourly.*

Scheduling a Modified Report

You will have the option to schedule the report you want to run from your “Favorites” or from the “Public Folders.” Scheduling a report from your “Favorites” will generate the customized report you saved. Scheduling a report from the “Public Folders” will generate the standard report.

[History](#) | [Schedule](#) | [Properties](#)

1. Select the report you want to run.
2. Run the report and save it to your “Favorites” folder or a personal folder that you have created (See topics, “Creating a Folder” and “Saving a Report”). This will allow you to schedule a customized report.
3. Select the “+” beside “My Folders.”
4. Select the **Favorites** folder. Choose the report you want to schedule.
5. Select the word **Schedule** under the report name. The “Schedule” portlet displays.
6. Notice that the “Instance title” fills with the report name you selected. The “When” category expands to reveal a dropdown menu. “Run Object” will default to “Now.”
7. Select the **Run Object** dropdown.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

8. Select, for example, the **Last Day of the Month** from the dropdown.
9. Notice that the remainder of the “*When*” category has changed to include a “*Start Time*” and “*End Time*” selection. The “*Start Time*” is the time and date you would like this report to run on a recurring basis. The “*End Time*” is the time and date that you no longer wish to have the report run on a scheduled basis.
10. Select the **Start Time** from the dropdown menu.
11. Select the **Calendar** icon and select, for example, **February 28th**.
12. Follow instructions above to select the **End Time**. You may want to change the end date for the report since the default is 2017.
13. Select the “+” next to the “*Format*” option to specify the format for the report.
14. The default is “*Web Intelligence*.” Select the dropdown if you want to change to either Microsoft Excel or Adobe Acrobat.
15. Select the “+” next to the “*Prompts*” option then select **Modify Values**. If you do not change the date range on your prompt values once you select “Modify Values,” you will see the same results each time the report is scheduled.
16. Enter the filters you want included in your report and select **Apply**. The prompt values will be displayed.
17. Select the **Schedule** button to complete scheduling the report. When the scheduled report is run, it can be found by selecting the “*History*” link under the name of the report you scheduled from your “*Favorites*.”

Rescheduling a Modified Report

1. Select the “+” beside “*My Folders*.”
2. Select the **Favorites** folder. Choose the report you want to reschedule.
3. Select the word **History** under the report name.
4. Select the **Reschedule** link. You are now back on the schedule page.
5. Select the “+” next to the “*Prompts*” option then select **Modify Values**.
6. Enter the filters you want included in your report and select **Apply**. The prompt values will be displayed.
7. Select the **Schedule** button to complete scheduling the report.
8. You are now returned to “*History*” and will notice there are two instances of the scheduled report.
9. On the tool bar within the portlet, place a check mark in the small box next to the originally scheduled instance of the report and select the **Delete** button to remove the old report.

Data available for ACE reports includes the previous four CBP fiscal years plus the current fiscal year. The CBP fiscal year runs October 1 through September 30.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Deleting a Scheduled Modified Report

To delete a previously scheduled report, follow the instructions below:

1. Select the “+” beside “*My Folders.*”
2. Select the **Inbox** folder.
3. Select the check box beside the report name that you wish to delete.
4. Select the **X** icon shown at the top of the “*Inbox*” screen. The report selected will be removed from the “*Inbox.*”

Creating an Alerter

You have already logged into the ACE portal, selected the “*Reports*” link from the “*Accounts*” tab, launched the report tool and successfully run a modified report. When the results are displayed you want to add an alerter, which helps you highlight certain conditions or attributes in a report. This calls attention to that defined condition. To create an “*Alerter*” follow the instructions below:

1. Highlight the column you wish to contain the alerter.
2. Select the **Alerter** icon  on the tool bar.
3. Select **New** when the “*Alerter*” box appears.

4. The Alerter Editor box appears. Enter a “*Description*” for the alerter.
5. Under the “*Sub Alerter*” section, select **Operator** from the drop down list.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

6. Select **Operand(s)** or enter an amount depending on your alerter. For example, type the District Port Code. You can add a second alerter by selecting the + button.
7. To change the format of the alerter, select the **Format** button. You can format the following elements in your report.
 - a. Number format – number, currency, date/time, etc.
 - b. Cell properties – text, cell border, cell background colors
8. Select **OK** to close the “*Alerter Editor*” box. You are returned to the “*Alerter*” box.
9. Select **OK** to close the “*Alerter*” box. Alerters have now been added to the report.
10. Save your report.

Creating Charts and Graphs for a Modified Report

There are charts and graph options to depict the results of your modified report. To create a chart or graph, your tool bar options should be “*View Structure*” and you need to be in the “*Edit Report*” mode. Select **Templates**.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

1. Select “+” beside the folder you want to choose from to open the sub-folders.
2. Select the chart of your choice, and drag and drop just below the report.

Drag and drop the chart or table below the report

3. Change from the template view to the data view, and drag and drop “Measures” (pink circles) directly on the “Place measure objects here” section. You can drag and drop multiple “Measures” in that section.

4. Drag and drop dimension objects (blue squares) into the “Place dimension objects here” section.
5. Select the **View Results** tab on the tool bar. The chart results are now visible.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Changing a Chart Type

To change the type of chart or graph, choose one of the options listed below:

1. Right click in the center of the chart and select **Turn To** and select a different chart/graph; or
2. Drag a new chart over from the template view and drop it on the chart or graph you wish to replace.

Creating Multiple Charts on One Report

To depict the data in an additional chart format, you can add another chart type by the following:

1. Right click on the original chart.
2. Select **Copy**.
3. Move cursor to area below the original chart and right click.
4. Select **Paste**.
5. Then drag a different chart onto the duplicate chart.

Changing a Measure or Dimension

You have viewed the chart and have decided you would like to change the data objects. To change the Measure (Y Axis – Pink) or Dimension (X Axis – Blue) in the chart, select the **View Results**, drag another measure or dimension directly onto the one you wish to replace, or you may drag the measure or dimension back to the data box, or right click on the item you wish to remove and select **Remove**.

=[Entry Number]

=[Entry Number]

Sizing a Chart

Select the chart and place the cursor over the border you wish to change. The cursor will change to the double arrow; click and drag the border to the desired size. Repeat for the other border if you would like to change the size.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Removing a Chart

To remove a chart, either right click on the chart and select **Remove**, or verify that the data tab is displayed and drag the chart from the document and drop it in the data section.

Changing Properties of Charts and Graphs

The properties of each chart and graph can also be changed. The appearance, colors, page lay out and more can be changed to fit your needs.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Printing a Modified Report

To print a modified report you will need Adobe Acrobat, as you are only able to print in PDF mode unless you would like to save and print the report from Excel. For instructions on saving, see the section above called “*Saving a Modified Report.*”

1. Select the **Printer** icon.
2. Choose “*Landscape*” or “*Portrait*” layout (you must choose the layout now before opening in “*PDF*” mode).
3. Select the **OK** button. The report will open in the “*PDF*” mode.
4. Select the **Printer** icon. The print options window displays on your screen. From this window you can specify number of copies, etc.
5. Select the **OK** button in the “*Printer*” dialog pop-up box to print.

Chapter 3: Customized Report

Creating a Customized Report

This section provides instructions on how to create a customized report from scratch by using the “*Web Intelligence Document*” capability.

Trade users (other than TAO and PTAO) who do not have access to the “Web Intelligence Document” capability can also create a fully customized report from scratch by simply removing all of the data objects and filters in a modified report and adding desired data objects to meet specific needs.

You have already logged into the ACE portal, selected the “*Reports*” link from the “*Accounts*” tab and launched the reports tool. To create a customized report from scratch, follow the steps below:

1. Select the down arrow “▼” on the toolbar to the right of the “*New*” icon.
2. Select **Web Intelligence Document**. A new screen will open which displays a list of Universes.

3. Select the appropriate Universe, for example **Account Management**, to create your customized entry summary report. A new screen will open once you have selected the Universe.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

4. To expand the list of objects under the Account Management Universe:

- a. Select a “Class” (e.g. Entry Summary, etc.) to expand the list of objects. Additional data elements will be displayed to customize the report.
 - b. Select the objects you would like displayed in the report and drag them from the left side of the screen under the “Data” tab to the “Result Objects” pane.
 - Note: You may also select the new object by double-clicking the object to move it to the “Results Objects” pane. Multiple objects may be selected at one time by holding down the shift key to move them to the “Results Objects” pane.
 - By dragging and dropping an object into the “Result Objects” pane the object will be available to add to the report once it has run.
5. Follow the steps above to add filters to the “Query Filters” pane. Similar to the data objects in the “Result Objects” pane, dragging and dropping an object into the “Query Filters” pane will apply it to the query.
- a. “Query Filters” is where the prompts can be set.
 - b. “Query Filters” allows you to retrieve a sub-set of data from the database without first having to pull all the available data before filtering. This improves report performance because you are limiting the amount of data being pulled from the database.

When creating a report from scratch and requesting data objects from the Entry Report class, the Importer of Record (IR) number and date range will be a predefined filter. There is, therefore, no need to enter an IR number or the date range in the query filters. However, for reports created from all other classes, CBP recommends you enter a date range in your filters to ensure you receive results.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

When creating a report from scratch or adding a query to an existing report, if you are logged on as a Broker, you **MUST** include your filer code in the report to receive results. The filer code can be added to either the “*Result Objects*” pane or the “*Query Filter*” pane.

To add the filer code to the “*Result Objects*” pane, select the filer code with the blue box to the left and drag it over. If you want to add the filer code to the “*Query Filter*” pane, you will need to follow the steps below:

1. Drag the filer code with the blue box to the left into the “*Query Filter*” pane.
2. Select the dropdown arrow to the right of the “*On List*.”
3. Select **Equal To**.
4. Select the dropdown arrow to the right of “*Type a constant*.”
5. Select **Object**.
6. Select the filer code with the blue box to the left from the Broker Class.

Importers and sureties will need to drag their Importer number or Surety code into any report that created from scratch or when adding a query to an existing report.

6. After adding a new filter to the “*Query Filters*” section, select the down arrow “▼” to view options for defining the filter.
7. Select **Constant, Value from a List, Prompt** or **Object**.
 - a. A “*Constant*” allows you to enter a specific value or values that do not change unless you edit the query again. This is useful when you have a certain port, carrier, importer, broker ID or other data that remains the same for this report.
 - b. “*Value from a List*” allows you to select a value from a list, if one is provided.
 - c. “*Prompt*” allows you to type in text when prompted. When the report is run the prompt will require your input. You may also select default values if you choose a prompt.
 - d. “*Objects*” will allow specific variable objects to be used in the filters. See section titled “*New Date Objects*.”

8. Select the **Edit Report** button.
 - a. When you return to the “*Edit Report*” view, the new data objects added to the report will be displayed in the “*Data*” pane.
 - b. You must add the new data objects to the report in order to see the data.
9. Drag and drop or double-click the objects to be added to the final report. It is possible to add more than one object at a time by highlighting the objects to be added to the report.

10. Select the **Refresh Data** button.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

11. When the “Prompts” dialog box opens, update prompts as needed then select **Refresh Data** to display the report.

OR in lieu of steps 8 through 11

12. Select the **Run Query** button.

13. When the “Prompts” dialog box opens, update prompts as needed then select **Run Query** to display the report.

14. Drag and drop or double-click the objects to be added to the final report. It is possible to add more than one object at a time by highlighting the objects to be added to the report.

Cannot drop here. Incompatible object

Incompatible objects: Sometimes it is not possible to use certain combinations of data objects. This is because the data objects are not related. These objects are called “incompatible.” If you run a report and include incompatible objects, you will not be able to combine the data by dragging and dropping objects.

You may occasionally see a “Context Pop-up” if based on the objects and filters you have chosen, the reports tool has more than one way to answer the question. When this happens, the possible classes will be listed and anyone of them is valid depending on the results you are seeking. This will happen more frequently with Transactions reports than Account Management reports. Let’s say as a broker you want a list of importers whose entry summaries had been flagged for team review in the past 6 months. You create your report by selecting filer code, importer number and importer name. In this example, the objects can be pulled from several classes. You would highlight the “Team Review” class to obtain the needed results.

All Other Functions for Customized Reports

For all other functions, except creating the customized report, please refer to corresponding sections within the “Modify Reports” section. Other functions include sorting, adding a new date object, printing, charts and graphs, etc.

Chapter 4: Authorized Data Extract

Running an Authorized Data Extract

An Authorized Data Extract (ADE) is necessary when data requested in one report exceeds the current data quantity limitation of 65,000 lines. ADE allows you to schedule a report to run with up to 2,000,000 lines of data. This data is returned in raw data format and will need to be saved in an “Excel” or “CSV” format for data format manipulation.

The following should be noted for those electing to schedule an ADE: (1) Only the TAO or the Proxy can schedule an Account Management Cargo Entry, Cargo Exam (temporarily disabled), Entry Summary, Entry Summary Compliance and Account Revenue extract; and (2) All users will be able to schedule the Aged Liquidation AD/CVD Entry Summary Report extract.

1. Select the **Authorized Data Extract** folder.
2. Select the Authorized Data Extract you want to schedule:
 - AD-001 Entry Summary Report
 - AD-002 ADD/CVD Case Report
 - AD-003 Cargo Entry Report
 - AD-004 Cargo Exam Result Report (temporarily disabled)
 - AD-005 Team Review Report
 - AD-006 Account Revenue – Receivables (AR 006 and AR 007)
 - AD-008 Account Revenue - Aged Entry Report (AR 002)
 - AD-8027 Aged Liquidation AD/CVD Entry Summary Report

Title	Last Run	Type
AD-001 Entry Summary Report View Latest Instance History Schedule Properties	3/16/2008 7:59 PM	Web Intelligence Document
AD-002 ADD/CVD Case Report View Latest Instance History Schedule Properties	3/5/2008 12:08 PM	Web Intelligence Document

3. Select the word **Schedule** under the report name. You will be taken to the scheduling screen. If you select the report name, you will also be taken to the scheduling screen.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

4. Select **Modify Values**.
5. Enter the filters you want included in your extract and select **Apply**. The prompt values will be displayed. Since the maximum row limit for each extract is two million, you will need to adjust the date range accordingly, when scheduling the selected extract.
6. Select the **Schedule** button to complete scheduling the extract. The status will display after the report has been scheduled.
 - You can also view the status of the extract by selecting the **History** tab associated with the ADE report name that was scheduled.
 - The extract status, either “*Pending*,” “*Running*” or “*Success*,” will be displayed on the history screen. When the word “*Success*” is displayed, you will find the report in the “*Inbox*.”
7. Select **Inbox** from “*My Folders*” and select the name of the “*Shortcut to*” the Authorized Data Extract scheduled. It may take a few seconds or minutes for the file to display.

- The extract will be delivered in a “CSV” format. The file will be zipped.
8. Save the extract file to your computer. The file will automatically be saved in a “CSV” format. Then select **Open** to view the extract. You will see two files listed:

Name	Type	Packed S...	Has a ...	Size	Ratio	Date
AD-001_Entry_Su...	Text Document	1 KB	No	1 KB	3%	3/16/2008 9:03 PM
AD-001_Entry_Su...	Microsoft Offic...	1 KB	No	1 KB	58%	3/16/2008 9:03 PM

- One file will be the “CSV” file and will contain the data extract.
- The other file is a text file and will reflect the number of rows in the extract. Double-click on the text file first to view the number of rows in the extract.

The text file will read “---2,000,000 rows. (Warning: Partial Result returned due to row/time limitations)” if the extract file exceeds the 2,000,000 row limit. You will need to narrow the request to receive results.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

If the extract is successful but no data is returned, then the extract has exceeded the time limit allowed and you need to narrow the request to receive results. This may happen, depending on the size of your account, when you use “all” as the default for the filer and the importer prompts. The error message received will read: “---- 0 rows. (Warning: Partial Result returned due to row/time limitations.)” When possible it is always best to use specific filer codes and importer of record numbers.

9. Double-click on the “CSV” file if the text file has 65,000 rows or less. The file will open in “Excel.”
10. Select the “CSV” file if the text file has over 65,000 rows. This will highlight the file name.
11. Select **Extract**.
12. Decide where you want to save the extract file and select **Extract**.
13. To open the file in Microsoft Access, do the following:
 - Select **Access** and then select **Open**.
 - Select **text files**.
 - Select **desktop** or wherever you saved the “CSV” file.
 - Follow the Wizard to open the file. Make certain to check the box which indicates “*first row contains field names.*” Also, if the “*Text Qualifier*” box does not default to show a double quotation (“), select the (“) from the drop down.
 - Double-click the file name to open in Access.

The “*Inbox*” will show the last three instances of each extract. By selecting **History** under the ADE name you will see the last three instances of that extract. Please ensure you save the extract to your desktop computer since only the last three extracts will be available in the inbox.

Please note that if a TAO of an ACE Portal Account grants cross account access to a TAO of another Portal account, the TAO/PTAO with cross account access will have the ability to run an ADE for both accounts. By giving “No Access” to the “Reports” tab, the Portal Account granting access can grant a user access to an account but restrict their ability to run an authorized data extra or any other type of report. This allows for cross account access but prohibits access to ADE or any other type of report.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

Chapter 5: Additional ACE Resources

There are several options to help you better understand the ACE Reports Tool and how to fully utilize the tool.

- The second version of the ACE Portal Reports Dictionary has been completed and is available for download to user's desktops. The ACE Portal Reports Dictionary defines the most frequently run ACE Account Management, Account Revenue and Transactions reports. Formatted as a PDF file, the Reports Dictionary is available for each specific user category (Importers, Brokers, Carriers and Sureties) and is posted on CBP.gov (http://cbp.gov/xp/cgov/trade/automated/modernization/ace_welcome/ace_report_s/) within the "ACE: Modernization Information Systems" link, in the "ACE Training and Reference Guides" section, as well as in the ACE Resource Center.
- The "Help" folder located under "Public Folders" contains both the ACE Reports Data and the Reports User Guide. The Reports User Guide contains step by step instructions for running ACE reports.
- For additional assistance, take the web-based training (WBT) titled "ACE Reports for the Trade Community," or visit the "Training and Reference Guides" section on www.cbp.gov.modernization.

The URL for the ACE Online Training Center is:

https://nemo.customs.gov/ace_online

For more information on ACE, send an e-mail to CBP.CBPCSP0@dhs.gov. If you are a trade caller or if you are calling outside the United States, you can also contact **Technology Support at 1-866-530-4172.**

Appendix A: List of Available Reports

Account Management: Account Profile

Report Number	Report Name	Report Description
AM 5096 Broker	Broker -Account Profile	This report displays all information contained within an account profile by specific account type.
AM 5096 Trade Carrier	Trade Carrier - Account Profile	This report displays all information contained within an account profile by specific account type.
AM 5096 Importer	Importer – Account Profile	This report displays all information contained within an account profile by specific account type.
AM 5291	Power of Attorney File Listing	For Sureties only; this report displays the current Power of Attorney (POA) on file with CBP.

Account Management: Aggregate Reports, Cargo Entry

Report Number	Report Name	Report Description
N/A	Cargo Entry Reports - Summary	This report displays the entered value and number of entries, by all of the tabs listed below.
Mfr Codes Tab	Summary of Manufacturer (Mfr) Codes by Value	This report displays the entered value and number of entries, cargo lines (number of line items) and discrepancies by manufacturer code during the specified date range. The end user is prompted for the IR number, entry date period or creation date.
HTS Nbrs Tab	Summary of Harmonized Tariff Schedule (HTS) Numbers by Value	This report displays the total entered value and number of entries, cargo lines and discrepancies by ten-digit HTS number for the specified date range. The end user is prompted for the IR number, entry date period or creation date.
Entry Type Codes Tab	Summary of Entry Type Codes by Value	This report displays the total entered value and number of entries, cargo lines and discrepancies by entry type code for the specified date range. The end user is prompted for the IR number, entry date period or creation date.
POE Codes Tab	Summary of Port of Entry (POE) Codes by Value	This report displays the total entered value and number of entries, cargo lines and discrepancies by port of entry code for the specified date range. The end user is prompted for the IR number, entry date period or creation date.
COO Codes Tab	Summary of Country of Origin (COO) Codes by Value	This report displays the total entered value and number of entries, cargo lines and discrepancies by country of origin code for the specified date range. The end user is prompted for the IR number, entry date period or creation date.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

IR Nbrs Tab	Summary of IR Numbers by Value	This report displays a list of IR numbers (related to the importer account) ordered by the total entered value and number of entries, cargo lines and discrepancies during the specified date range. The end user is prompted for the IR number, entry date period or creation date.
Consignees Tab	Summary of Consignees by Value	This report displays a list of consignees ordered by the total entered value and number of entries, cargo lines and discrepancies during the specified date range. The end user is prompted for the IR number, entry date period or creation date.
IR Nbrs by Date Tab	Summary of IR Numbers by Date and by Value	This report displays a list of IR numbers sorted by date and ordered by the total entered value, number of entries, cargo lines and discrepancies grouped by month for the specified date range. The end user is prompted for the IR number, entry date period or creation date.
Consignees by Date Tab	Summary of Consignees by Date by Value	This report displays a list of consignees sorted by date and ordered by the total entered value, number of entries, cargo lines and discrepancies grouped by month for the specified date range. The end user is prompted for the IR number, entry date period or creation date.
Filer Codes Tab	Summary of Filer Codes by Value	This report displays a list of filer codes ordered by the total entered value and number of entries, cargo lines and discrepancies during the specified date range. The end user is prompted for the IR number, entry date period or creation date.
AM_086	Summary of Entry Type Codes by Number of Cargo Entries	This report displays a list of entry type codes ordered by the total entered value and number of entries, cargo lines and discrepancies during the specified date range. The end user is prompted for the IR number, entry date period or creation date.

Account Management: Aggregate Reports, Cargo Exam

Report Number	Report Name	Report Description
N/A	Cargo Exams Reports - Trade	This report displays the number of entries, line items and discrepancies by all of the tabs listed below.
POE Codes Tab	Summary of Point of Entry (POE) Codes by Number of Cargo Exams	This report displays a list of POE codes ordered by the number of entries, line items and discrepancies as well as the types of discrepancies found during the specified date range. This report also shows the number of discrepant lines and a count for each type of discrepancy. The end user is prompted with the IR number, filer code and exam date period.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

IR Nbrs Tab	Summary of IR Numbers by Number of Cargo Exams	This report displays a list of IR numbers ordered by the number of entries, line items and discrepancies found during the specified date range. This report also shows the number of discrepant lines and a count for each type of discrepancy. The end user is prompted with the IR number, filer code and exam date period.
Filer Codes Tab	Summary of Filer Codes by Number of Cargo Exams	This report displays a list of filer codes ordered by the number of entries, line items and discrepancies found during the specified date range. This report also shows the number of discrepant lines and a count for each type of discrepancy. The end user is prompted with the IR number, filer code and exam date period.
HTS Nbrs Tab	Summary of HTS Numbers by Number of Cargo Exams	This report displays a list of HTS numbers ordered by the number of entries, line items and discrepancies found during the specified date range. This report also shows the number of discrepant lines and a count for each type of discrepancy. The end user is prompted with the IR number, filer code and exam date period.
Consignees Nbrs Tab	Summary of Consignee Numbers by Number of Cargo Exams	This report displays a list of consignees ordered by the number of entries, line items and discrepancies found during the specified date range. This report also shows the number of discrepant lines and a count for each type of discrepancy. The end user is prompted with the IR number, filer code and exam date period.
Entry Type Codes Tab	Summary of Entry Type Codes by Number of Cargo Exams	This report displays a list of entry type codes ordered by the number of entries, line items and discrepancies found during the specified date range. This report also shows the number of discrepant lines and a count for each type of discrepancy. The end user is prompted with the IR number, filer code and exam date period.
COO Codes Tab	Summary of Country of Origin (COO) Codes by Number of Cargo Exams	This report displays a list of COO codes ordered by the number of entries, line items and discrepancies found during the specified date range. This report also shows the number of discrepant lines and a count for each type of discrepancy. The end user is prompted with the IR number, filer code and exam date period.
Mfr Codes Tab	Summary of Manufacturer IDs by Number of Cargo Exams	This report displays a list of manufacturer identifications (IDs) ordered by the number of entries, line items and discrepancies found during the specified date range. This report also shows the number of discrepant lines and a count for each type of discrepancy. The end user is prompted with the IR number, filer code and exam date period.
Exams by Month Tab	Summary of Number of Cargo Exams by Month	This report displays the number of entries, line items and discrepancies, as well as the types of discrepancies found by exam month and year. The end user is prompted with the IR number, filer code and exam date period.

Account Management: Bonds

Report Number	Report Name	Report Description
AM-5042	Bonds	This report displays bond information by bond number including surety, rider and partner information.

Account Management: Broker Permits and Employees

Report Number	Report Name	Report Description
AM-5278	Broker Employee List	This report lists the names of people employed by the broker for a given port, providing the number of employees by office code, by port or nationwide. A drill down capability to the employee's address history is provided by selecting the Address History column.
AM-5278.1	Broker Employee Address History	This reports shows the employee address history. We recommend using the drill down capability to view additional addresses for the employee.
AM-5288	Filer Code	This report lists the name and address of all offices for all filer codes. A drill down capability to the Filer Points of Contact report is provided by selecting the Point of Contact field.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

AM- 5288.1	Filer Points of Contacts	This report displays all points of contact entered by the Filer.
------------	--------------------------	--

Account Management: Declarations

Report Number	Report Name	Report Description
AM_7002	Trade Declarations	This report will display all declarations associated to an IR number or group of IR numbers and will be used to review declarations when a particular entry summary is filed by the trade.

Account Management: Detail Reports, Cargo Entry

Report Number	Report Name	Report Description
AM_065	Cargo Entry Details Report	This report displays detailed information related to cargo entries, including entered value. The results are sorted by entry date, creation date, entered value or IR number. Other filter values include: entry number, filer, manufacturer code, HTS, consignee, entry type, mode of transportation, POE, COO and date range.
AM_069	Cargo Entry Lines by HTS Number	This report displays detailed information related to cargo entries, including entered value, by HTS number for a specified date range. The end user is prompted with the IR number, creation date or entry date period.
AM_070	Cargo Entry Lines by POE Code	This report displays detailed information related to cargo entries, including entered value, by POE code for a specified date range. The end user is prompted with the IR number, creation date or entry date period.
AM_071	Cargo Entry Lines by Filer Code	This report displays detailed information related to cargo entries, including entered value, by filer code for a specified date range. The end user is prompted with the IR number, creation date or entry date period.
AM_072	Cargo Entry Lines by Entry Type Code	This report displays detailed information related to cargo entries, including entered value, by entry type code for a specified date range. The end user is prompted with the IR number, creation date or entry date period.
AM_073	Cargo Entry Lines by COO Code	This report displays detailed information related to cargo entries, including entered value, by COO code for a specified date range. The end user is prompted with the IR number, creation date or entry date period.
AM_074	Cargo Entry Lines by Manufacturer Code	This report displays detailed information related to cargo entries, including entered value, by manufacturer code for a specified date range. The end user is prompted with the IR number, creation date or entry date period.
AM_075	Cargo Entry Lines by Entry Number	This report displays detailed information related to cargo entries, including entered value, by entry number for a specified date range. The end user is prompted with the IR number and entry date period.

(For all Importer, Broker and Surety Trade Users)

Account Management: Detail Reports, Cargo Exam

	Report Name	Report Description
AM_058	Cargo Exam Details by Date Range	This report displays the number of discrepancies by type related to cargo exams for a specified date range. Results are sorted by exam date, entry and line. The end user is prompted with the IR number, filer code and exam date period.
AM_059	Cargo Exam Details by Entry Number	This report displays the cargo exam results by type for a specified entry number. Results are sorted by exam date, entry and line. The end user is prompted with the IR number, filer code and exam date period.
AM_066	Cargo Exam Details	This report displays specifics about cargo exams based on multiple filter values (i.e., entry number, IR number, filer, manufacturer code, HTS, consignee, entry type, mode of transportation, POE, COO and date range) over a user-specified date range. This report will allow the user to drill down to view details on cargo exam discrepancies.

Account Management: Detail Reports, Entry Summary Reports

Report Number	Report Name	Report Description
AM_001	Entry Summary Lines by HTS Number	This report displays a detailed list of entry summary lines ordered by HTS number for a specified date range. The results are sorted by entry date, creation date, HTS number or IR number.
AM_002	Entry Summary Lines by POE Code	This report displays a detailed list of entry summary lines ordered by POE code for a specified date range. The results are sorted by entry date, creation date, POE code or IR number.
AM_003	Entry Summary Lines by Filer Code	This report displays a detailed list of entry summary lines ordered by filer code for a chosen date range. The results are sorted by entry date, creation date, filer code or IR number.
AM_004	Entry Summary Lines by Entry Type Code	This report displays a detailed list of entry summary lines ordered by entry type code for a specified date range. The results are sorted by entry date, creation date, entry type or IR number.
AM_005	Entry Summary Lines by COO Code	This report displays a detailed list of entry summary lines ordered by COO code for a specified date range. The results are sorted by entry date, creation date, country of origin code or IR number.

Topic: Running ACE Reports

(For all Importer, Broker and Surety Trade Users)

AM_006	Entry Summary Lines by COE Code	This report displays a detailed list of entry summary lines ordered by COE code for a specified date range. The results are sorted by entry date, creation date, COE code or IR number.
AM_007	Entry Summary Lines by Manufacturer Code	This report displays a detailed list of entry summary lines ordered by manufacturer code for a specified date range. The results are sorted by entry date, creation date, manufacturer code or IR number.
AM_008	Entry Summary Line Detail	This report displays all the entry summary lines associated with a specific entry number. The results are sorted by entry date, creation date, entry summary number or entry summary line number.
AM_064	Entry Summary Line by Entry Number	This report displays specific account entry summary information over a user-specified date range for a specific entry summary number. Users can link to reports on entry summary line, tariff and quantity information.
AM_068	Entry Summary	This report displays specific account entry summary header information over a specified date range for a specific entry summary number. Users can link to reports on entry summary line, tariff, quantity, anti-dumping countervailing duty and team review information. This report will allow the user to drill down from the entry summary line to either the tariff level or to view information about antidumping / countervailing duties.
AM_087	Filer Summary	This report displays, for a given importer number, a summary of filer information, sorted by port of entry code, by filer code and by IR number for a specified date range. The user will be prompted for the POE code, filer code, creation date or entry date period.

Account Management: Detail Reports, Entry Summary Compliance

Report Number	Report Name	Report Description
AM_062	Team Review Details by Date Range	This report displays the team review details and discrepancy information for a specified date range. This report is sorted by review date, entry summary number or entry summary line number.
AM_063	Team Review Details by Entry Number	This report displays the team review details and discrepancy information for a specified entry number. This report is sorted by review date, entry summary number or entry summary line number.
AM_067	Team Review Details	This report will display specifics about team reviews that occurred over a user-specified date range. Multiple filter values can be used and include entry number, filer, manufacturer code, HTS number, consignee, entry type, mode of transportation, POE, COO and date range. This report will allow the user to drill down to view details on team review discrepancies.

Appendix B: Assistance with Entry Summary Reports

Appendix B is designed to provide additional assistance in running reports found in the Entry Summary folder. The Entry Summary Universe has been redesigned to make it easier to use and to provide additional flexibility when creating and modifying ESM reports. The redesign resolves numerous incompatibility issues previously experienced when running Entry Summary reports. In addition, data objects now appear in alphabetical order within each report sub-class. Below is the new structure of the Entry Summary Universe:

Report Class	Report Sub-Class
Summary Header	Header
	Header EDI
	Additional Header Objects
	Bond
	Cargo
	Header Reconciliation
	Status
Summary Line	Census Warnings
	Line Indicators
	Declarations
	Line Tariff
	Line Tariff FCC
	Line
Summary Header and Line	Counts
	Dates
	Date Objects
	EIP RLF
	Milestone ES Events
	PSC (Post Summary Corrections)
Financials	AD/CVD
	Collections

The following pages contain a list of data object by class for the “ESM 1002 Entry Summary Universe.”

Appendix C:

Post Summary Corrections (PSC) Impact on ACE Reports

An authorized ACE entry summary filer may submit a post summary correction for an ACE entry summary originally submitted by another ACE entry summary filer if authorized by the same importer of record.

- If the PSC is filed by someone other than the entry filer, ownership of the entry summary moves to the PSC filer.
- The "PSC filer" is a new field within ACE which identifies the filer that submits the PSC.
- Only the PSC filer and the importer of record will be able to view the specific entry summary that was corrected. The entry summary information will not appear in reports when run by the original filer.
- The original filer will receive a UC message when a PSC has been filed. The original filer will also be able to run an ABI query and view limited information on the entry summary that was corrected.

The reports that are impacted by the **PSC filer** are listed below.

Impacted Reports and Categories

Report Category/Report or Extract Name	Report Tool Navigation Folder Path
